

# THINK AMMONIA!

## SPOT THE SYMPTOMS OF HIGH AMMONIA

**These symptoms may occur in cases of high ammonia.**

It's important to note that symptoms can be non-specific and that they may vary from person to person based on age and how ammonia levels are.

**SEIZURES**

**COMA**

**LOSS OF  
MUSCLE  
COORDINATION**

**CONFUSION**

**This is a rare condition but if you suspect that you or a loved one are experiencing symptoms of high ammonia, seek medical attention.**

If you live with a condition at risk of high ammonia, it's important to see your healthcare provider regularly to manage your condition and monitor your ammonia levels. You should also look out early signs of high ammonia which may begin with vomiting, headaches and lethargy before worsening.

**Scan the QR code using the camera on your smart device or type in the link for further guidance on high ammonia.**
